

UFHT Aluminium Diffuser Plates

Aluminium Diffusion plates are 1 metre long and are designed to fit between joists at 400mm centres. Plates are manufactured from 0.6mm thick, grade HE10 50 aluminium sheet.

The 3 channel 133mm UFH pipecentre plate will produce 86 Watts/m² on a flow temperature of 55°C.

The filled system weight of the Aluminium Diffuser Plate system is 1.41kg/m².
