

TechnoLo Low Profile Panel

600mm x 600mm **TechnoLo** Low Profile Underfloor Heating Panel

The **TechnoLo** Low Profile Underfloor Heating Panel is 15mm deep and 600mm x 600mm square, it is designed to interlock with adjoining panels to create a single sheet across the entire floor.

The **TechnoLo** panel features a preformed hole for fixing in each eye and has multiple V shaped groove "break points" to aid in cutting.

The 12mm Underfloor Heating pipework is secured in place at 150mm spacing by an integrated system of clips, no additional fixing is required.

TechnoLo Low Profile Underfloor Heating Panels are available without an insulation layer or with a pre-bonded high compressive strength insulation in 3mm, 6mm or 10mm thickness.
