

## TechnoLo Low Profile Panel

The **TechnoLo** Low Profile Underfloor Heating Panel is 15mm deep, 1050mm long and 650mm wide, giving an area of 0.6m<sup>2</sup> coverage per sheet. It is supplied with a self-adhesive backing ready to be secured to the 4mm insulation.

The **TechnoLo** panel requires no additional fixing down.

The 12mm Underfloor Heating pipework is secured in place at 50mm, 100mm or 150mm spacing by an integrated system of clips, no additional pipe fixing is required.

## 4mm Insulation

Thin, flexible, easy to install, aluminium bubble insulation membrane. Acts by trapping air within the bubble structure while creating low emissivity air spaces from foil-faced outer layers, enhancing overall thermal capabilities. Suitable for roofs, walls and floors.

- Thermal Resistance up to 1.497W/m<sup>2</sup>K
- Suitable for Domestic Use
- Lightweight Aluminium
- Reduces Risk of Condensation
- Maintains Thermal Performance
- Equivalent to 55mm Polystyrene
